

"WONDER IF THIS IS A BOY OR A GIRL!?!?"

**BIPLANE STRUT MOUNTS**

Where your interplane struts attach install a ply rib which is slotted to accept a pair of control horns as a firm fit. The mounting feet of the horns dissipate the strut loads over a much wider base, the single screw doing no more than keeping the horns in place and therefore carrying no load. The struts attach with ordinary Z-bends at the lower end, and clevises at the top to allow for final fitting and incidence adjustment.

'Relationships are hard. It's like a full time job, and we should treat it like one. If your boyfriend or girlfriend wants to leave you, they should give you two weeks' notice. There should be severance pay, the day before they leave you, they should have to find you a temp.'

--Bob Ettinger
